

Electric cars

By Diana Celeste Flores

INTRODUCTION:

Electric car facts:

1. They are very modern and are used with just electricity.
2. Has a beautiful, unique interior and exterior design.
3. they can drive themselves.

More on electric cars:

1. Electric cars have an electric motor.
2. have automatic brakes.
3. They are also eco-friendly unlike gas that pollutes the air.

WHAT PROBLEM WILL IT SOLVE?

1. These cars have an automatic brake which means these cars can basically save your life.
2. Pollution, since this car runs on electricity.

WHAT ARE SOME WAYS THIS TECHNOLOGY CAN STILL IMPROVE?

1. It can improve with the amount of charging stations, there aren't many nearby which is a problem for many electric car owners.
2. It can also improve on making it less dangerous and make it more safe with the automatic drive.

CONCLUSION:

1. This technology can affect people's health because it is safe for the environment and does not pollute the air like vehicles that need gas. 2. In the future, I believe that there will be more electric cars than regular vehicles.
